

ICWRE-2014

International Conference on Water Resources and Environmental Management
Global Institute for Water, Environment and Health (GIWEH)

13-15 May 2014
Antalya, Turkey

Role of Governance in the Management of Water Resources and Environment

The ICWRE-2014 follows successful ICWRE-2011 (20-24 November 2011; Marrakesh, Morocco) and ICWRE-2013 (09-11 April 2013; Geneva, Switzerland).

It aims at bridging a gap between policy, science and practice in the field of water resources and environmental management; becoming an efficient discussion platform for European, Middle Eastern and African stakeholders; contributing to debates on environment related topics that take place on national different levels; sharing knowledge and raising awareness of environmental issues.

Registration

Deadline for "Oral presentation" or "Poster presentation" (abstract submission) — 31 January 2014

Deadline for "Attendance only" — 15 March 2014

ICWRE-2014

Scientific themes 2014

13-15 May 2014
Antalya, Turkey

I. Political dimension (policy and diplomacy)

- Integrated institutional approach to water resources management and multidisciplinary approach to environmental management and sustainable use of water resource
- Water diplomacy: transboundary governance, issues of quality, scarcity and equality
- Strengthening legal frameworks and political commitment on water and environmental management
- Role of NGOs and private sector in water resources and environmental management
- Role of international organizations in water and environmental governance

II. Regional dimension

- Global and regional network for water and environmental cooperation: capitalizing on best practices and information exchange
- Regional challenges of water and environmental security and governance: transparency, corruption and strengthening the rule of law

III. WIPO Session: Intellectual property and new patents in green water technologies

IV. Science and Technology

- Green and new technologies in water sector. Clean and renewable energy
- Modelling, simulation and multi-criteria analysis as tools for decision-making process in water sector
- Waste water recycling and energy recovery
- Challenges in arid and semiarid zones: water scarcity and water use efficiency, desalination and climate change impact

**Win GIWEH
Award 2014!**
